Welcome

My name is Lev Abramzon, sculptor and artist.

As the founder of New Safari and its product developer for over 20 years – my company is providing the need for creative and original design and branding of parks, city entrances, streets and squares across Israel.

If you are a designer, an architect or landscape architect - you will find our products range inspiring for the upgrading of the urban environments or the interior spaces you plan.

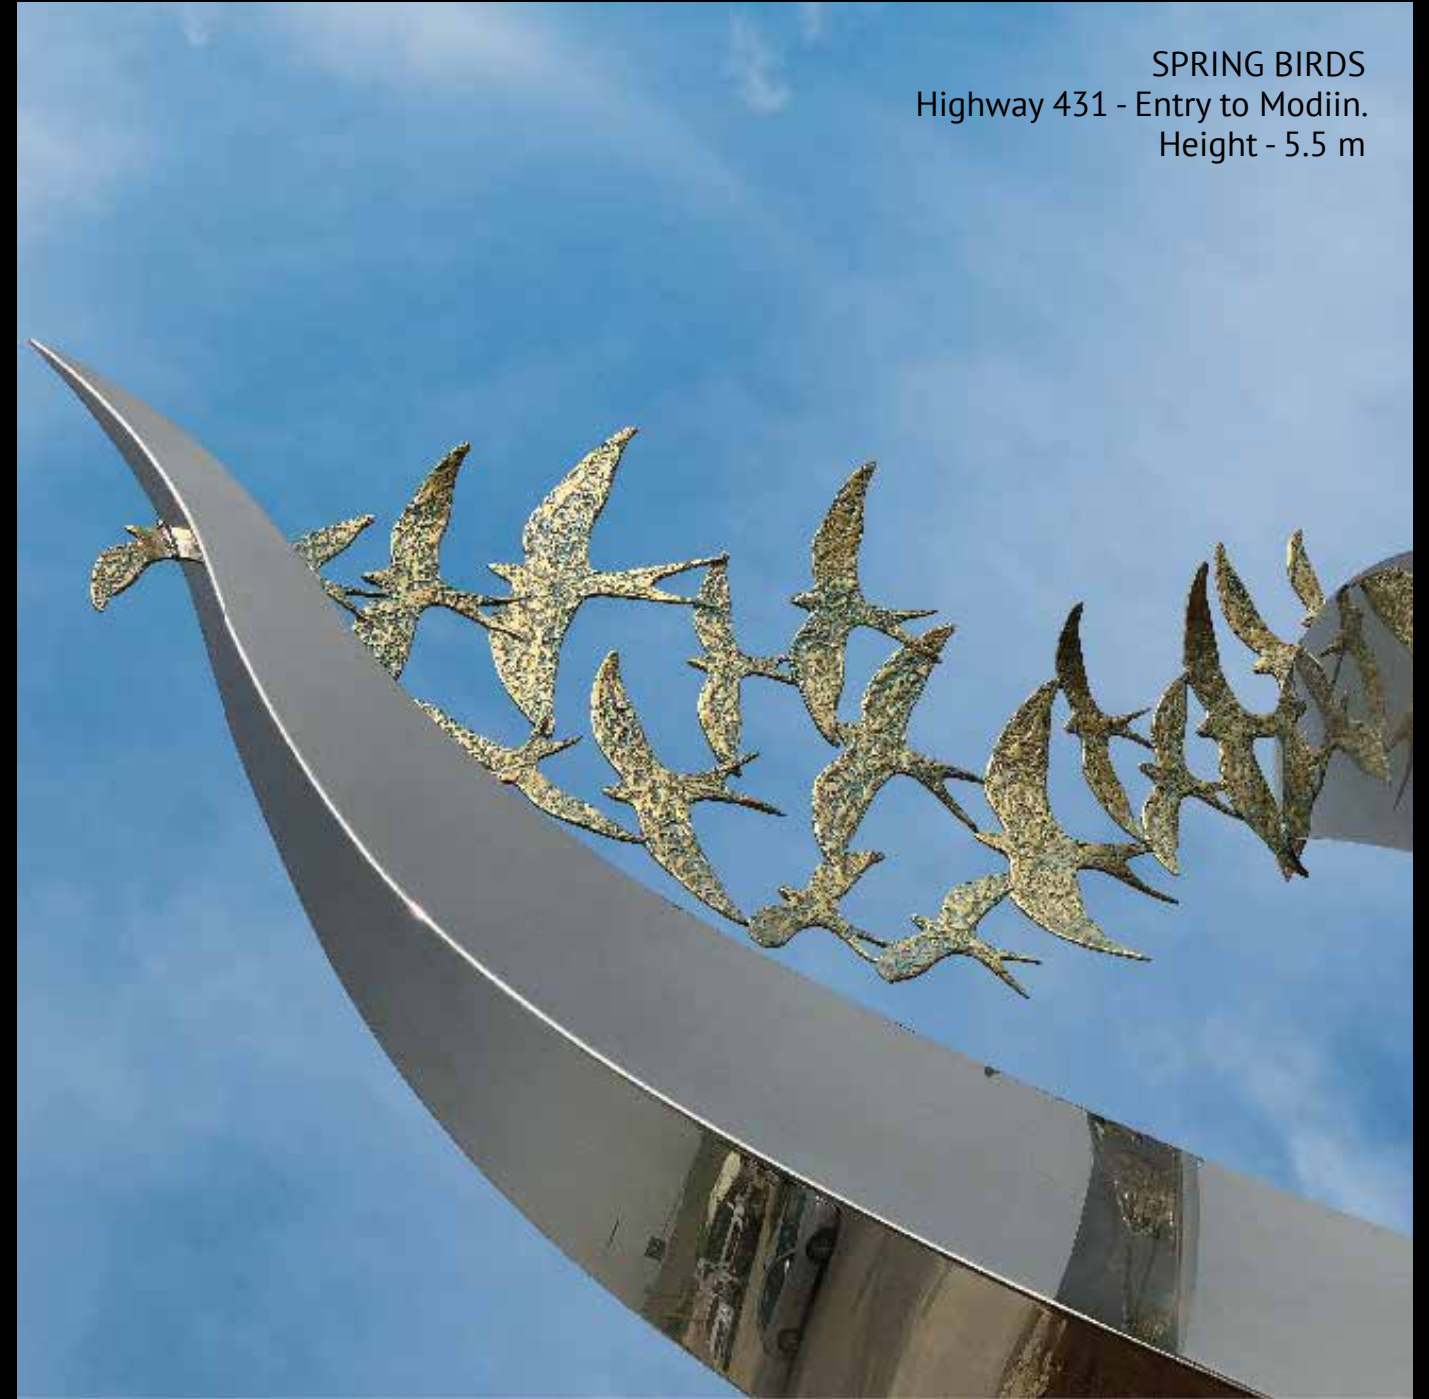

If you work with municipal authorities - I invite you to be introduced to the way many cities across the country have already implemented my sculpting products in order to upgrade, design and brand their urban spaces.

And if you own an office, a company or a corporation - You are welcome to get familiar with the more luxurious sculpture products and furniture that can be used as a visual icon and on your
